CONSULT NOTES

*What are your current hair goals?
What length are YOU looking for?*

*How often do you currently wash your hair?
Is your hair chemically treated? If yes, when was it done?*

*Are there any scalp conditions that I need to be aware of (psoriasis, eczema, oily scalp)?
Are you on any medications or any type of therapy that is currently impacting your hair growth?
Are you currently taking any hair growth supplements?
Are you currently pregnant or planning to conceive in the near future?*

*Do you engage in activities involving saunas or tanning beds?
Do you wear glasses (wig consults)?
What type of activities do you do on a daily basis?*

maintenance contract

Client's Name:

Date of Service:

Initial each Instruction

___1 Do not shampoo for 24 hours. Always wash your hair with your head up or back like in a shower and not tilted forward. Never put conditioner on your bonds, keep 3" away from scalp. Never dry with a scrubbing action, instead wrap with a towel to absorb water. Always dry bonds to prevent breakdown.

___2 Run your fingers between your bonds every day to keep extensions from tangling together. It is very important to be gentle with your hair extensions. They are attached to small amounts of your own hair. While hair extensions themselves will not harm your hair, rough handling of them will pull your hair and may cause damage.

___3 Brush extensions 2-3 times a day, or the amount recommended by your stylist, with the recommended hair extension brush. Start in the nape and work your way up. Always pull extensions into a covered hair tie or braid while sleeping to prevent tangling. Never go to bed with wet hair. If you sleep restlessly or you have very fine hair in the front it is recommended that you sleep with a soft head band on. This protects your delicate front hair.

___4 Make a follow-up appointment for 6-8 weeks after your initial service. Notify stylist/salon immediately if you have any problems such as tangling or excessive loss of extension hair.

___5 Curling irons, flat irons and hot rollers may be used, but must be kept an adequate distance from the bonds or tape.

___6 Activities taking place in a constant, damp environment such as aerobics, steam baths or saunas may lessen the longevity of the extensions. Dry your bonds as soon as possible after any of these activities.

___7 I have received a copy of the "Hair Extension Care Guide", and I understand it.

Initial each Instruction

___8 Seawater and pools can cause damage and tangling. To minimize these effects, wet hair completely in a shower and apply a conditioner to the ends. After swimming, shampoo and blow-dry the bonds to prevent bond breakdown.

___9 Some extension loss and shedding are normal and to be expected. It is normal to lose 1-4 extensions a month. Average client hair loss is 50-150 hairs a day. A full head application covers approximately one third of the head. You can expect to see a small quantity of naturally released hairs trapped in the attachments after some time. This is normal and should not be interpreted as hairs pulled of the scalp by the extensions themselves. Daily brushing close to the scalp and finger separation of the applied strands will avoid matting in this area.

___10 There are no refunds on hair extension applications. Deposits may not be refundable; each hair extension application is different. Please discuss any issues with your hair extensionist.

___11 Purchasing your hair extensions outside of the establishment relives us of all liability of the hair extension.

I have read, initialed, and understood my home care maintenance sheet. If I do not follow the above instructions, I understand Hair & Nail Republic cannot be held responsible.

Gratuity is not required but greatly appreciated.

care guide

1. Brush hair gently working from ends toward scalp before and after washing.
2. Use a professional sulfate free shampoo for dry-color treated hair. NEVER USE A VOLUMIZING SHAMPOO! Volumizing shampoos raise the cuticle of hair and can cause tangling.
3. Wash hair gently in cool to warm water. Do not scrub roughly while washing. Gently comb through hair with fingers in a downward motion while washing and rinsing.
4. Do not apply conditioner to scalp or bonds. Too much conditioner or very oily hair can weaken the keratin bonds or tape.
5. It is best not to wash more than 2-3 times a week unless you have a very oily scalp. Over washing will dry the hair. Use a dry shampoo in between shampoos.
6. Softly towel dry by patting with a towel before blow drying. It is important to dry the roots, but you don't have to completely dry extensions unless you are going to bed.
7. Use a spray leave-in and/or shine drops on your extensions after shampooing while still damp, (avoiding the bonds). Apply to ends daily if needed.

8. If extensions become dry and damaged treat once to twice a week with a deep conditioner. Keep 2" from scalp.
9. Brush gently 2-3 times a day. Brushing right up to the scalp will keep tangles from forming at the base of the extension. Use one of the following brushes:
10. When blow-drying hair, blow downward with hair's natural growth, not up into / against hair flow. Dry with fingers then style with a curling iron or flat iron if needed.
11. Swimming Always wet hair with tap water, apply conditioner and braid hair before swimming to help avoid tangling. Avoid salt water, (the worst for extensions), and chlorine.
12. Braiding long extensions is recommended before bed.
13. NEVER GO TO BED WITH WET HAIR. (Causes tangling and matting)
14. Have extensions checked every 4-6 weeks by stylist.
